

### SPAP Overview

The Medicare Modernization Act (MMA) legislation allows State Pharmaceutical Assistance Programs (SPAPs) to “wrap around” the Medicare benefit to fill coverage gaps. SPAPs are designed to provide state-funded programs financial assistance for prescription drugs. This assistance focuses on those with low-income and/or the medically-needy with disabilities. These programs enable states to provide improved coverage for beneficiaries at a lower cost to the states.

### Public Health Rx Solution

**Ramsell Public Health Rx** is a leading Pharmacy Benefit Management company. We offer a fully-integrated SPAP solution designed specifically for Public Health providers. The **Ramsell Public Health Rx SPAP** solution includes the following features:

“The choice to work with Ramsell Public Health Rx was an easy one due to the company’s intricate knowledge of the process and detailed reporting that goes into a public health program.”

*Dwayne Haught,  
Texas Dept. of State  
and Health Services*

**Data Management System:** capable of receiving and storing program member enrollment data; tracking, managing and reporting this data; and facilitating the CMS data exchange process.

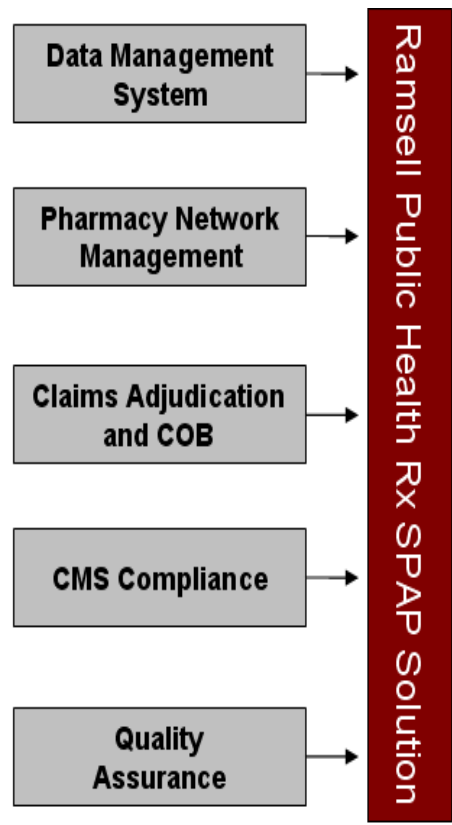

**Pharmacy Network Management:** geographically dispersed pharmacy network to provide prescription dispensing services.

**Claims Adjudication:** Electronic claims adjudication services for pharmacy provider prescription claims processing and TrOOP facilitation.

**Coordination of Benefits (COB):** coordinate client SPAP and Medicare Part D plan benefits to assure proper order of billing.

**CMS Compliance:** adherence to the rules and regulations for SPAP’s as defined by CMS.

**Quality Assurance:** processes and procedures to adhere to program rules, policies, and limitations including drug coverage and drug costs.

### Ramsell Public Health Rx Solution
