

Ramsell Public Health Rx has developed a state of the art document management system specifically designed to support entities involved in administering Ryan White Act programs. The solution provides the ability to convert hard copy enrollment files into an electronic format that is stored in a secure database. Stored enrollment data can then be easily searched and retrieved through a secure Web-based application. All you need to utilize our Document Management Solution is a fax machine and Internet access. Ramsell Public Health Rx takes care of everything else.

Document Management Process Flow

Document Management Solution Benefits

- **Reduce storage costs**
Electronic data storage eliminates the requirement to store paper files for an extended period of time
- **Save time and money by retrieving needed data within seconds**
Significantly reduce staff resources expended on retrieving files from storage
- **Easy audit compliance**
Reduce time and money spent searching and retrieving requested information for audit purposes
- **Simple integration into existing enrollment process**
Quick and easy integration with your current enrollment and eligibility process
- **Remote access capability**
Access your data from anywhere with information available either on-line or in CD format
- **Disaster recovery**
Data is safe and secure if a disaster occurs since PHSB provides data storage at multiple locations to ensure that your records are always available
